### EDUCATION

---

#### California Baptist University

Bachelor of Science: Computer Science

National Society of Black Engineer (NSBE)

Riverside, CA

June 2026

### EXPERIENCE

---

#### Impact Africa

Artcom IT Director

Yaoundé, Cameroon

January 2022 - February 2023

- Spearheaded the development and implementation of IT infrastructure and systems, ensuring smooth operations and enhanced productivity for the team at Artcom.
- Provided strategic guidance and technical expertise in areas such as network security, software implementation, and IT support, contributing to the growth and success of the startup.

#### PK Fokam Institute of Excellence

BYTES Club Programming Instructor

Yaoundé, Cameroon

September 2021 – May 2023

- Taught students the fundamentals of front-end programming, including HTML, CSS, and JavaScript, empowering them to create dynamic and visually appealing websites.
- Provided personalized guidance and feedback to students, fostering their growth and proficiency in front-end development.

### LEADERSHIP

---

#### PK Fokam Institute of Excellence

BYTES Club Programming Instructor

Yaoundé, Cameroon

September 2021 – May 2023

- Demonstrated leadership, responsibility, and trustworthiness to both teammates and Head of department.
- Exhibited time management skills: class schedule management, teaching, and organizing board member meeting.

#### National Society of Black Engineer

MEMBER

Riverside, CA

August 2021 – Present

- I actively participated in organizing events and initiatives within NSBE, collaborating with fellow members to achieve common goals and objectives.
- Through networking events and conferences, I developed strong communication skills and built a valuable professional network within the engineering community.

### PROJECTS

---

#### Machine Learning: The Survival of the Titanic

Participant.

Riverside, CA

September 2023 - October 2023

- Collaborated with a team of 3 colleagues to complete tasks if someone will survive the sink of the titanic
- Designed and implemented project in python to solve our task.

#### Telecom Billing Management system

Team Leader

Yaoundé, Cameroon

January 2023 - June 2023

- Successfully led a team in developing and implementing the Telecom Billing Management System, using Java programming language to improve efficiency and accuracy in billing processes.
- Collaborated with cross-functional teams, including data scientist to ensure smooth project execution and timely delivery.

### SKILLS

---

Java Programing, Python programing, C++, Web Development, Problem solving.
